A very enjoyable game if you liked the first then you will like this.. I'm a fan of Pandemic the board game, and I've found this online version really enjoyable to play solo. (I've read that some people wish there were multiplayer and/or AI options, but these wouldn't be relevant to me.)

This online version of Pandemic has an interface that's intuitive; its mechanics are flawless*; and the graphics communicate what's happening in the game effectively.

There are only a couple of minor annoyances I have: the sound effects are irritating (I turned them off VERY quickly); the useful Undo feature is inconsistently available (e.g. for a player's final action); and the Discard excess cards option should not let you discard Events so easily.

*At present (November 2018) it has one bug that means that I have to abandon about 1 game in 10, but I'm hoping this is a teething problem that will be fixed.

. Blue Whale is one of the least interesting horror games I have played. I purchased it because I kind of liked the Creepypasta it was (very loosely) based off of, and enjoy the indie/pixel-horror subgenre quite a lot. Unfortunately this game doesn't take a whole lot from the creepypasta it is based on, and lacks any real direction in general. There is not a whole lot here in terms of horror either. I felt more bored and disappointed than I felt fearful. The game even tries to have a sense of humor that doesn't mesh with the horror aspects either, which wouldn't be a huge deal breaker if the sense of humor was actually funny. Also, I do not think there is any save feature here, which makes the experience even more frustrating. That said, I do believe that this game is the developer's first public project, so there is nowhere to go but up. I would love to see this developer improve in the future, even if their first outing was a disappointment.. Excellent puzzle game and platform game. Lots of fun+unique puzzle mechanics, great music, and good puzzle/level design. Highly recommend.. As a fan of Gun Rocket I definitely wanted to try this game and can say I didn't regret finishing it the first time...

While starting a New Game+ I was positively surprised by some of the ideas implemented to make the levels a lot harder. I kept playing till I got stuck here:

[I tried and tried, but had to contact the developer. He decided to change the level and I finally got an update:](#)

[I was still excited and continued playing past the 1st boss in New Game+. At a certain moment - while at this level 'Detour' - I came to the conclusion that the game wasn't a fun experience anymore; there was just too little room for error \(again\), and with that in mind, you were forced to move very slowly a lot of the time. Not a problem in case of a short level experience, but that wasn't the case a lot of the time. That aside, it's not possible to move backwards nor use a 'handbrake' or similar to completely park the triangle/rocket, making it only harder \(especially with your 'Luv', where you sometimes need 4 eyes\); not only unforgiven, also unfair I had to conclude, partially caused by slowness = annoyance. Checkpoints are recommended in some levels, but there are none.](#)

[A few recommendations for an update:](#)

[- 'Reverse gear' = moving backwards; only being able to make turns and rotate, often means dying through 1/3 edges of the triangle, because there's little room for error \(in New Game+\);](#)

[- The possibility to completely park the triangle, not moving a pixel;](#)

[- Level tests in New Game+...the progression in difficulty didn't always make sense, caused by a time limit, gravity \(%\) or fuel limitations;](#)

[- Level screen! Could have motivated me to continue or maybe I could have skipped a few levels first, if that would have been an option. I didn't have any insight regarding my progress, I could only find some numbers in the game data...](#)

[That being said, I can actually still recommend playing this game, because there's enough fun before you start a New Game+ - which I don't expect everyone to start anyway. I just have mixed feelings about the New Game+ Mode and actually regret having started it...I could eventually finish it, but when something's not entertaining anymore, it's better to stop. I left the game with a bad taste in my mouth.](#)

[7/10 - If you like Gun Rocket and are good at it, definitely try this, but think twice prior starting a playthrough in New Game+.. A classic I was introduced to on the PS1. I enjoyed it, but the whole use an entire memory card for one game prevented me](#)

from ever really getting into it. Now the the original PC version is available. I can thoroughly enjoy it as it was meant to be played. Dated? Yes, but still solid after all these years.. 9 dragons is way too many. Didn't have much time for VR today. Project Cars 2 took forever to download and my wife had me working on the "Honey Do" list this Sunday afternoon. Quickly DL'd Flip the Table and destroyed the first 2 rooms twice. I feel great now. The wife asked me what I was doing and soon she was destroying rooms! Great simple game to work off some bad vibes. Highly recommend and hope for more updates.. quote:Air Control" of puzzle platformer games. Even share same Unity engine!

Good thing I got this for a price of CS:GO crate I sold. Game has absolutly no soundtrack and lot to repitive puzzle elements that are mostly based how luck box you control bounce off.

And price without discount - 10 EUR?!?! It should be taken down for scamming gamers.

If you really plan to spend 10 EUR on puzzle platformer games - go buy LIMBO instead this♥♥♥♥♥♥

This game has quite a lot of potential. I'm looking forward to full ver of this game. (they should add hand break and multiplayer mod). Boring, run-of-the-mill tower defence game. Lots of repetition, not much challenge.

Localisation to English is questionable in places.. This is one of the best routes I have ever purchased! The scenery is fantastic, has good amount of rolling stock and two great detailed locomotives! This is a must have for any train sim user!. 10/10 VR Experience

Mind Blowing Stuff !. Very entertaining! Could get tedious at times but the constant flow of zombies always keep you on edge. This is what Dead Frontier 2 could have been. However, there are little things that gets annoying. A lot of the items can only be placed in specific areas and that is very confusing. It would also be better if there are more zombie types. But overall, a great game!
